

San Juan Basin - WRIA #2

Watershed Description

WRIA #2 encompasses about 399,583 acres. The climate is influenced by maritime air masses and the rain shadow effect of the Olympic Mountains. The islands are part of the Puget Lowlands ecoregion. The San Juan Islands are glacial scoured islands with small intermittent streams and limited surface water. Surface material is very gravelly silt loam to gravelly loam. Potential vegetation is Douglas-fir, grand fir, and some Garry oak. The mean temperature ranges from 36/46° (winter) to 52/62° (summer).

Population

There are approximately 14,077 people living in the San Juan basin. The primary population centers are Eastsound and Friday Harbor. The majority of people live in unincorporated areas. The population graph reflects the combined projected population of those counties located within the watershed (Office of Financial Management population projections).

Counties	% of basin
San Juan	100%

Tribal Reservation Lands in WRIA #2
none

Land ownership for WRIA #2 includes federal, state, local, and private lands. Data was derived from the Public Lands Survey by Washington Department of Natural Resources (DNR).

Land Ownership	Acres	Proportion
Federal	2,786	7.0%
State	10,278	2.6%
Local	733	2.0%
Tribal	0	0%
Private	385,785	96.5%

Land use in the San Juan Basin is mainly water related, with some agriculture and forest. The general type of known land-use activities¹ within the watershed is graphed according to the percentage of its occurrence.

Land Use in the San Juan Basin

¹ Category "other" may include perennial ice/snow, bare rock/sand/clay, quarries/strip mines/gravel pits, transitional, barren, and/or wetland areas.

The primary towns and cities in WRIA #2 include Eastsound and Friday Harbor.

Legislative and Congressional Districts

To determine your region's legislative or congressional district, see:

<http://www1.leg.wa.gov/DistrictFinder/Default.aspx>

To determine **Latitude/Longitude** coordinates, see:

<http://www.topozone.com/>

(Make sure you set the button on the bottom of the page to D/M/S - hold the cursor over a spot on the map and the coordinates show at the bottom of the screen.)

Several federal programs refer to watersheds according to their Hydrological Unit Code (HUC). To learn more about your watershed and determine which HUC your town or county is located in, see:

<http://water.usgs.gov/wsc/>

Water Quality

Water Quality Assessment

The statewide Water Quality Assessment categorizes waterbody segments that have water quality data available. The Simple Query Tool and interactive mapping tool allow you to search for specific categories, water bodies, pollutant parameters and other information, in whatever combination you choose. WRIA #2 has three (3) known Category 5 (impaired) water bodies.

To view the Water Quality Assessment, use the Simple Query Tool.

<http://apps.ecy.wa.gov/wats/WATSQBEHome.asp>

To view the Water Quality Assessment by Category, choose the Category (1 – 5) you are interested in from the drop down box. To view it by Water Resource Inventory Resource Area (WRIA), choose the WRIA number you are interested in from the drop down box.

Use the Interactive Mapping Tool to see a graphic representation of the Water Quality Assessment. This is a Geographic Information System (GIS) application that helps you find waters you are interested in and information about problems in that water body.

Domestic Water Supply

Within this WRIA are larger community water systems that significantly utilize surface water sources. For further information regarding water supplies, see:

<http://www.doh.wa.gov/ehp/dw/default.htm>

Salmonid Stock Status

Good water quality is important to help salmon survive and thrive. To find out which salmon species are listed as threatened or endangered in a region, see:

<http://www.governor.wa.gov/gsro/regions/map.htm>

Commercial and Recreational Shellfish Growing Areas

Commercial shellfish growing areas are classified by the Washington State Department of Health as either: Approved, Conditionally Approved, Restricted, or Prohibited.

For the most up-to-date information about shellfish area designations, see:

<http://www.doh.wa.gov/ehp/sf/grow.htm>

Recreational shellfish closures are determined by the Department of Health and local health jurisdiction; for information contact your county or health district or see:

<http://www.doh.wa.gov/ehp/sf/local.htm>

TMDLs and Other Watershed-Based Plans

For information about Total Maximum Daily Loads (TMDLs) in your area, see:

<http://www.ecy.wa.gov/programs/wq/tmdl/>

To learn more about **watershed planning** in Washington State, see:

<http://www.ecy.wa.gov/watershed/index.html>
